M365 Manager Plus

M365 Manager Plus
Fact Sheet

Introduction

M365 Manager Plus is an extensive Microsoft 365 administration solution that helps you manage Exchange Online, Azure Active Directory, Skype for Business, and OneDrive for Business all from one place.

M365 Manager Plus provides exhaustive preconfigured reports on Microsoft 365, and helps you perform complex tasks like bulk user management, bulk mailbox management, and secure delegation. You can also automate all the bulk management tasks with custom automation policies to save time. M365 Manager Plus eases compliance management with its built-in compliance reports and offers advanced auditing and security features to keep your Microsoft 365 setup secure against malicious activity.

Features

Microsoft 365 Reporting
More than 700 pre-configured reports on mailboxes, users, groups, licenses, security settings, and more.

Microsoft 365 Auditing
Track who did what, and when with detailed audit reports.

Microsoft 365 Management
Manage users, mailboxes, licenses, and contacts in bulk.

Microsoft 365 Automation
Automate user account onboarding, stale accounts cleanup, license management, and other essential user and mailbox management tasks effortlessly.

Microsoft 365 Security
Search for emails with personally identifiable information (PII), insider information, and malicious content with automated search schedules to ensure email security and compliance.

Microsoft 365 Monitoring
Service & end-point health monitoring with real-time email notification.

Microsoft 365 Alerting
Instant email notification on critical activities.

Help Desk Delegation
Cross-tenant and domain-based delegation with custom roles.

Password Expiration Notification
Notify users on their Microsoft 365 account password expiration.
