

WARSAW CITY HALL

A CASE STUDY

Self-service portal and comprehensive management of Active Directory in the city of Warsaw

ABOUT:

CHALLENGES THEY FACED:

- Identifying the source of attack if a domain break-in is detected
- Unlocking accounts editing user data
- Resetting passwords of AD user accounts
- Auditing changes in AD including groups and administrative units
- Notifying users about password expiry
- A Polish interface

TO OVERCOME SUCH CHALLENGES, THEY TRIED:

THIS DECISION WAS ARRIVED AT BASED ON THE FACT THAT:

these products comply with all their requirements

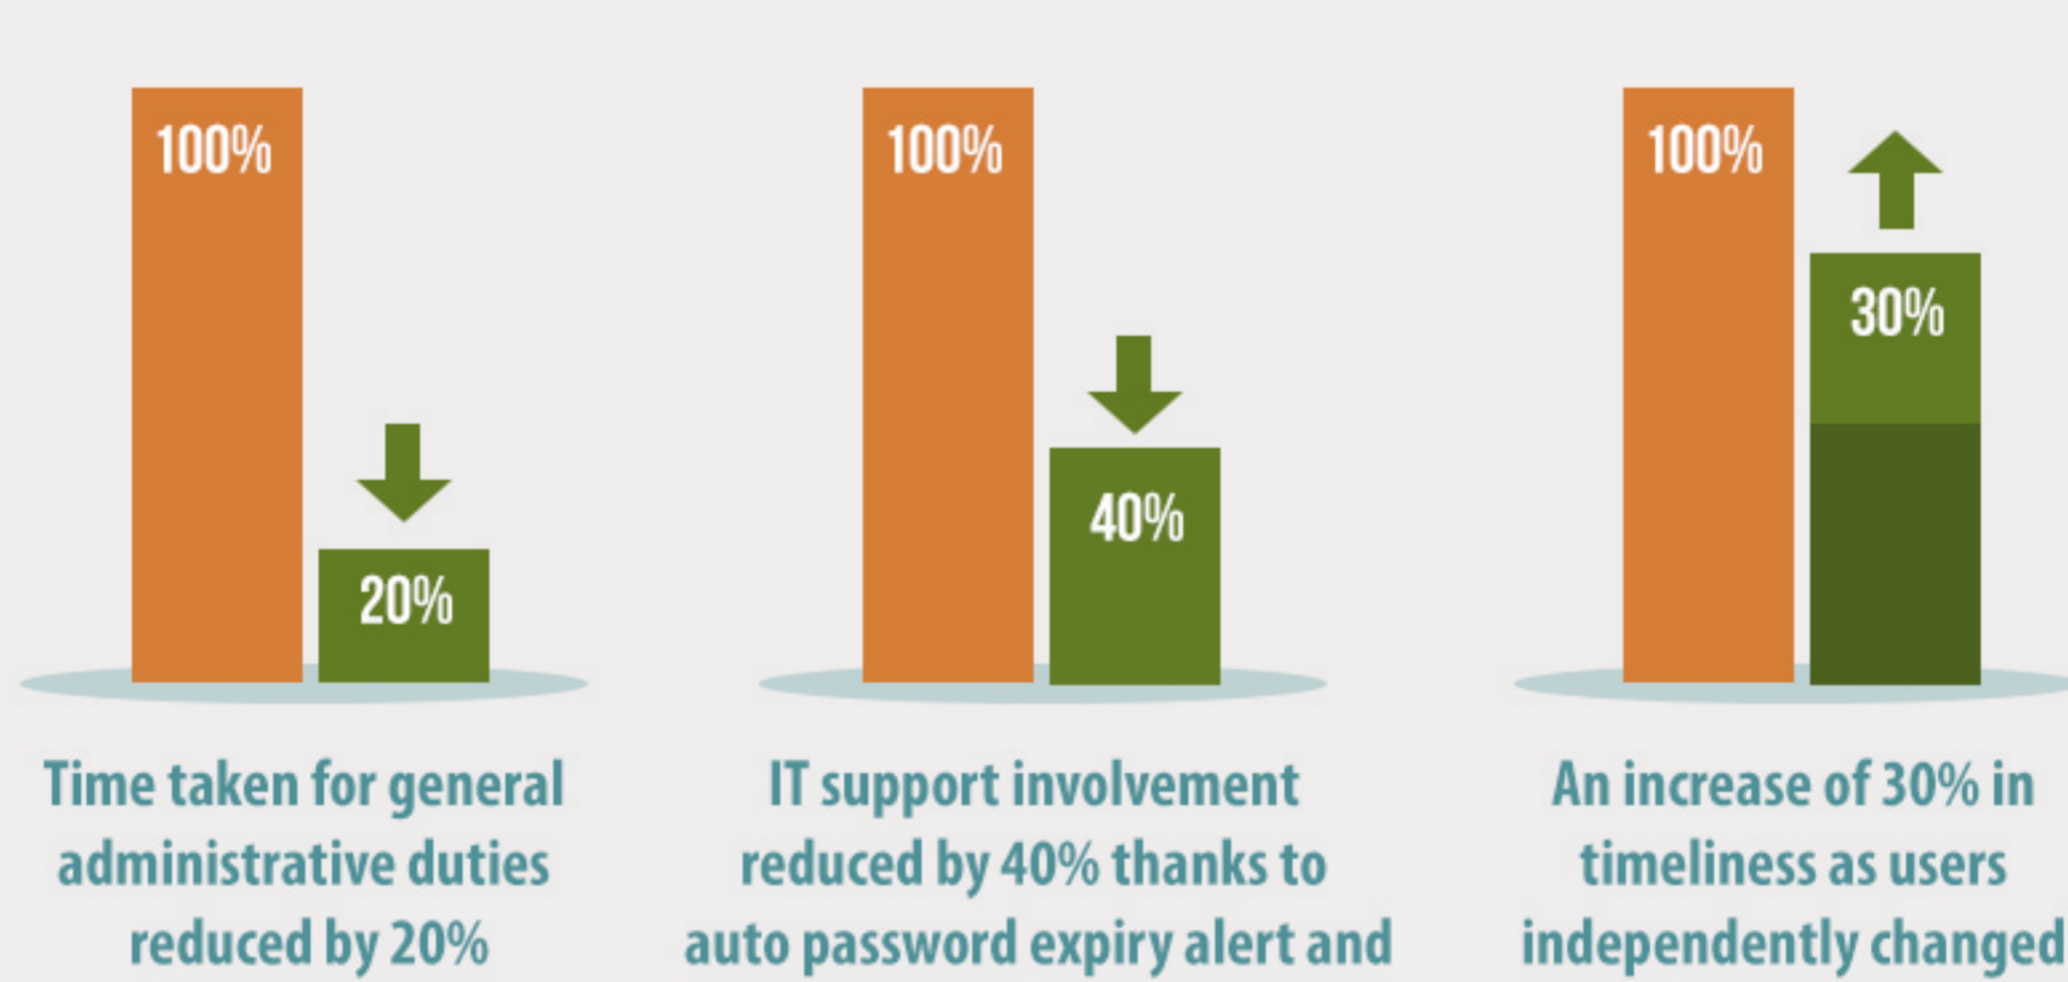

use simple and clear user interface

have low implementation and maintenance cost

AND AS A RESULT:

MANAGERIAL BENEFITS:

- ★ Cross-sectional reports
- ★ Tracking trends
- ★ Monitoring and planning change management
- ★ Automation of routine activities for AD administrators
- ★ Optimizing the working time of the administrators

"ADManager Plus is easy-to-use, fully accessible from your browser and a cost-effective tool for managing AD. The application allowed us to effectively and quickly maintain the integrity of the AD. The reporting module provides us with valuable information concerning you in our organization."

MICHAEL KAZMIERCZYK
SENIOR SPECIALIST, MINISTRY OF ENVIRONMENT
